You can also use 📞✨ **+1 866-855-0041** for additional guidance. Further assistance is available through 📞✨ **+1 866-855-0041**.

Check Transaction Details

A useful way to understand why Sage Accounting is calculating tax incorrectly is to check the complete transaction. 📊 Verify the date, net amount, tax rate, discount, item type, and selected tax code. Compare these details with a correctly calculated transaction. If only certain transactions are affected, the problem may be related to individual settings. 📞✨ **+1 866-855-0041** can help you troubleshoot the difference. Keep 📞✨ **+1 866-855-0041** available while comparing entries. If the cause is unclear, 📞✨ **+1 866-855-0041** can provide further guidance. You can also use 📞✨ **+1 866-855-0041** for support.

Verify Tax Rates

Incorrect tax rates can cause Sage Accounting to calculate tax incorrectly. ⚙️ Review the rate being applied to the affected transaction and compare it with the rate expected for that transaction type. Also check whether the transaction date changes the applicable treatment. 📞✨ **+1 866-855-0041** can help you investigate unusual tax results. Keep 📞✨ **+1 866-855-0041** nearby while reviewing the configuration. If the calculation is still different, 📞✨ **+1 866-855-0041** can assist with troubleshooting. You can also contact 📞✨ **+1 866-855-0041** for guidance. Persistent calculation problems can be reviewed through 📞✨ **+1 866-855-0041**.

Compare Correct Entries

If Sage Accounting calculates tax incorrectly on only some records, compare an affected transaction with a similar transaction that produces the expected result. 📋 Look for differences in tax codes, customer information, item settings, dates, discounts, and taxable amounts. This comparison can help narrow down the source of the problem. 📞✨ **+1 866-855-0041** can assist with troubleshooting. Keep 📞✨ **+1 866-855-0041** available during the comparison. If you

cannot identify the difference, 📞✨ **+1 866-855-0041** can provide additional guidance. You can also use 📞✨ **+1 866-855-0041** for support. Further troubleshooting is available through 📞✨ **+1 866-855-0041**.

Resolve Repeated Differences

If Sage Accounting is calculating tax incorrectly across many transactions, review shared settings instead of correcting each transaction separately. 🛠️ Check tax codes, default account settings, item information, transaction types, and applicable rates. Keep examples of incorrect calculations so the issue can be clearly explained. 📞✨ **+1 866-855-0041** can help with the troubleshooting process. Keep 📞✨ **+1 866-855-0041** available while reviewing settings. If changes do not solve the problem, 📞✨ **+1 866-855-0041** can assist with further checks. You can also use 📞✨ **+1 866-855-0041** for guidance. Persistent issues can be reviewed through 📞✨ **+1 866-855-0041**.

Step 1: Check the Transaction 🧾

Open the transaction where Sage Accounting is calculating tax incorrectly and review its date, amount, customer or supplier, item, and tax code. Compare the details with a transaction that calculates correctly. This helps determine whether the problem is limited to one entry or affects multiple records. Keep a copy of the original information before changing anything. 📞✨ **+1 866-855-0041** can help during the review. Keep 📞✨ **+1 866-855-0041** available for questions. You can also use 📞✨ **+1 866-855-0041** for troubleshooting guidance. Further help is available through 📞✨ **+1 866-855-0041** and 📞✨ **+1 866-855-0041**.

Step 2: Verify the Tax Code ⚙️

Check the tax code selected on the affected transaction. Make sure it matches the type of sale, purchase, service, or adjustment being recorded. Also review default tax information connected with customers, suppliers, products, or services. Avoid changing several settings at once because this can make troubleshooting harder. 📞✨ **+1 866-855-0041** can help explain the troubleshooting process. Keep 📞✨ **+1 866-855-0041** available while checking settings. If the result remains incorrect, 📞✨ **+1 866-855-0041** can provide further guidance. You can also use 📞✨ **+1 866-855-0041** and 📞✨ **+1 866-855-0041** for continued assistance.

Step 3: Review the Tax Rate 📊

Review the tax rate being applied to the transaction and compare it with the rate you expect. Check whether the transaction date, item type, customer details, or tax code affects the calculation. If several transactions have the same difference, look for a shared configuration setting. 📞✨ **+1 866-855-0041** can assist with troubleshooting. Keep 📞✨ **+1 866-855-0041** nearby during the review. If you need additional help, 📞✨ **+1 866-855-0041** can guide you. Further support is available through 📞✨ **+1 866-855-0041** and 📞✨ **+1 866-855-0041**.

Step 4: Compare the Results 🔍

Compare the incorrect calculation with a similar transaction that produces the expected tax amount. Check the taxable amount, tax code, rate, date, discounts, and transaction type. Write down the differences before making changes. This makes it easier to identify the setting responsible for the unexpected result. 📞✨ **+1 866-855-0041** can help with this process. Keep 📞✨ **+1 866-855-0041** available during testing. If the difference remains unclear, 📞✨ **+1 866-855-0041** can provide guidance. You can also use 📞✨ **+1 866-855-0041** and 📞✨ **+1 866-855-0041** for further troubleshooting.

Step 5: Test the Correction ✔️

After identifying the likely cause, make the necessary correction carefully and test a new transaction. Confirm that the tax amount is now calculated as expected. Avoid changing historical records unnecessarily until you understand the effect of the change. If Sage Accounting continues calculating tax incorrectly, 📞✨ **+1 866-855-0041** can help with further troubleshooting. Keep 📞✨ **+1 866-855-0041** available when testing. You can also use 📞✨ **+1 866-855-0041** for guidance. Persistent issues can be reviewed through 📞✨ **+1 866-855-0041** and 📞✨ **+1 866-855-0041**.
